

Family Caregiver Services

At Solace Pediatric Healthcare, we believe no one makes a better caregiver than a loved one, and we're here to equip you with the necessary tools to deliver that care. Our Family Caregiver programs allow family members (caregivers) the opportunity to earn an income for the care they provide in the home.

Does your loved one require every day care? Do they have a long-term diagnosis that impacts their everyday living? If so, they may qualify for one of our Family Caregiver programs. Colorado offers two State-funded programs that allow family members to earn a paycheck while taking care of their loved one.

Both programs, Family CNA (Certified Nursing Assistant) and In-Home Support Services (IHSS), generate employment for the caregiver while also providing the patient with the highest quality care.

These programs are FREE. Schedule a brief assessment with Solace. If eligible, we will send a Registered Nurse to your home. Upon completion of requirements to become a paid caregiver, the family member begins receiving weekly compensation and benefits.

FAMILY CNA

Family member completes CNA course (paid by Solace), attends a brief orientation and becomes an employee of Solace.

IN-HOME SUPPORT SERVICES

Family member attends a brief orientation and becomes an employee of Solace.

If your loved one has a long-term diagnosis requiring daily care, reach out to us to determine if you are eligible to participate in one of these impactful programs, receive weekly competitive compensation, and a multitude of benefits.

We are here to guide and offer support through this process every step of the way.
